How do you build and sustain a great culture, or strengthen a culture that is lacking? The answer lies in leadership. Leadership is the single largest factor affecting organizational culture. Bad leadership has a substantial impact on how the work environment feels and operates. The success of your organization is largely determined by the culture you create.

Guardian Leadership presents **Developing a Culture of Leadership Excellence**. During this interactive workshop, you will learn how to intentionally foster a positive culture that inspires and empowers team members to achieve organizational goals. This workshop demystifies the culture building process and provides you with a step by step method for creating an environment where trust flourishes, problems get solved and expectations are exceeded.

This **TWO-DAY** workshop will explore the value of:

- Cultivating a climate conducive to leadership growth and development
- Clarifying and communicating a purpose that resonates with others
- Defining and articulating a vision for your team and organization
- Creating shared values to galvanize commitment
- Achieving success in terms of a team
- Building a safe environment for taking risks and learning from failure
- Developing a successive leadership culture that lasts for generations
