## About This Workshop

The success of your organization is largely determined by the culture you create. How do you build and sustain a great culture, or strengthen a culture that is lacking? The answer lies in leadership. Leadership is the single largest factor affecting organization culture. Bad leadership substantially impacts how a work environment feels and operates.

During this interactive workshop, you will learn how to intentionally foster a positive culture that inspires and empowers team members to achieve organization goals. This workshop demystifies the culture building process and provides you with a step by step method for creating an environment where trust flourishes, problems get solved and expectations are exceeded.
